ECO Driving

Persons with Reduced Mobility

Safe Driving in Risky Situations

Two Wheels Vehicles Safe Driving & Risk Prevention

objective

we global journey management centers support drivers during each journey and reinforce safe driving behaviors. In-vehicle technology enables the centers to monitor driving behavior in real-time and provide immediate feedback on driver performance. The journey management centers perform data analytics to better understand driver behaviors to continuously improve driving safety initiatives.

Content

we need to ultimately eliminate driving related accidents that

cause fatalities and injuries to employees, contractors and third parties and minimize damage to

equipment through careful management of all phases of the transportation process.

The result of this training program is to have our staff better prepared to safely deal with

unplanned events/circumstances during routine trips that may occur. This includes:

- Identifying and managing hazards and unnecessary exposure through active journey

management

- Preventing and mitigating the risk through the proper selection and preparation of people,

vehicles, equipment and routes.
